

## Web Developer (m/f)

**We are looking for talented and motivated software engineers with experience in developing web applications to join our team.**

Are you a developer who

- wants to work with Java and/or Angular to develop scalable web applications
- is interested in building applications for processing large data-sets
- is eager to learn and to tackle problems not yet solved
- is an active part of an interdisciplinary & agile team
- shares his/her knowledge and experience with all team members
- takes on responsibility for own projects
- wants to work with technologies like Java, Angular, Docker, Kubernetes, Jenkins and SonarQube
- is interested in working with clients such as Audi, ÖBB, Post or Porsche Informatik

Then we would love to hear from you!

### Our philosophy

We know how to build digital products. We also know that creating high-quality solutions requires a high-quality work environment that caters for the needs of digital engineers.

For us this includes providing the devices you can work with best, offering the space for focused work and the time for continuous personal development. More concretely, that's what you can expect:

- great office in the heart of Vienna including a stunning terrace
- flexible working hours
- subsidies for lunch & free snacks / beverages
- subvention of child-care costs
- the ability to co-shape the company
- the craftworks Academy for constant learning

In our opinion, high-quality projects & products can only be built by teams sharing the same values. Our shared values are built around team-spirit, constant learning and building exceptional software solutions.

We offer competitive salaries, which depend on your personal qualifications and experience. In any case, we pay over the collective wage agreement starting at € 42.000 gross per year.
